Reference: Contract 

50X1

Gentlemen:

50X1

As of December 30,  became a subsidiary corporation of  Our former parent company,  has merged with  and the majority stock interest of 80.5% which had been held by  Previously,  had a guarantee of financial ability to perform from  A copy of this letter is enclosed. The guarantees have been assumed by  but we do not as yet have a letter from them which could be sent to you.

Our progress on the contract has been slowed somewhat because of technical problems and clarification of some of the technical requirements. The electronic and mechanical design work is now complete, however, and parts are being procured for the first models of both types of supplies. We request an extension of three months to the original contract time of six months in order to complete fully the contract.

A discrepancy has arisen in the pin connections assigned to the supply output connector. From a telephone conversation with  I made the notations shown on the accompanying chart dated December 23, 1960. Our engineers state, however, that we must have a pin (formerly pin 3) to be used in the battery charging mode of operation. Can we take pin 3 for this?

50X1

Enclosed are outline drawings of the laboratory version of this supply, now under construction.

Very truly yours,

50X1
